PLATA

PLATA is a product with high comfort and breathability characteristics, designed for techno-sportive clothing.

The 6% of **X-static** (silver fiber) gives to the yarn anti-bacterial and anti-microbial properties. The high conductivity of the silver also helps blood circulation.

X-STATIC is made with a layer of 99,9% pure silver, which is permanently bonded to the surface of a textile fiber. It is not a surface treatment, Silver is irreversibly bound to a polymer so it becomes a physical part of the fiber.

X-STATIC eliminates bacteria in less than one hour of exposure. The hotter and wetter the environment, the more effective **X-STATIC** becomes.

In **X-STATIC** there are no chemicals and there is no risk of toxicity for the consumer. **X-STATIC** has been tested for more than 250 washes without any reduction in antibacterial performance.

STOCKSERVICE

NE 30/1 - NM 1/50
NE 30/2 - NM 2/50

94% POLYESTER 702 FOR COOLMAX®
6% X-STATIC

FILARTEX

MY PERLA

KQ CATRAME

NJ CARBONE

KY OIL

FILARTEX

ELIMINATES STATIC

Reduces electrostatic charges.

REGULATES TEMPERATURE

Keeps you cooler in the summer and warmer in the winter.

ANTIMICROBIAL

Inhibits the growth of bacteria on the membrane, which prevents clogging and degraded performance.

COMFORTABLE

HIGH PERFORMANCE
ODOR PROTECTION

COOLMAX[®] THERMOLITE[®]

COOLMAX

technology has specially designed fibers that transport moisture away from your body to the surface of the fabric where it evaporates. So if the temperature is high, or you're being active, garments made with **Coolmax®** fiber helps keep you cool, dry and comfortable longer.

Counts available from Ne 12 to Ne 60. Raw, dyed and melange.

Corespun with Lycra 44dtex and 78dtex available from Ne 12 to Ne 60.

Stock service in 24 colours in Ne 12 and Ne 18.

COOLMAX
PRO

technology solutions meet our most demanding standards for moisture management performance. **Coolmax® Pro** technology can be used across a broad product range covering most fabric applications. Fabrics made with **Coolmax® Pro** technology can be tailored to meet the end user's performance needs, and are certified to ensure class-leading performance.

Continuous filament available in dtex 83/48.

THERMOLITE

technology delivers lightweight warmth by trapping an insulating layer of warm air between the fabric and your skin. It's engineered to keep you warmer longer without weighing you down. Whatever your favorite winter activity is, **Thermolite®** technology is engineered to help optimize your performance.

Counts available from Ne 12 to Ne 50. Raw, dyed and melange.

Stock service in 24 colours in Ne 12 and Ne 18.

COOLMAX
ALL SEASON

Fabric made with technology transports moisture away from the body to keep the wearer cool and dry on hot days, while fiber structures provide insulation on colder days.

THERMOLITE
ALL SEASON

technology is engineered to keep the wearer warm and dry, helping to optimize performance.

Counts available from Ne 12 to Ne 50. Raw, dyed and melange.
